Meet the **Slash Gen.**

*Indonesian University Student & Fresh
Graduates, 18-25*

Class all day. Squad all night. **And often
both, on the same screen.**

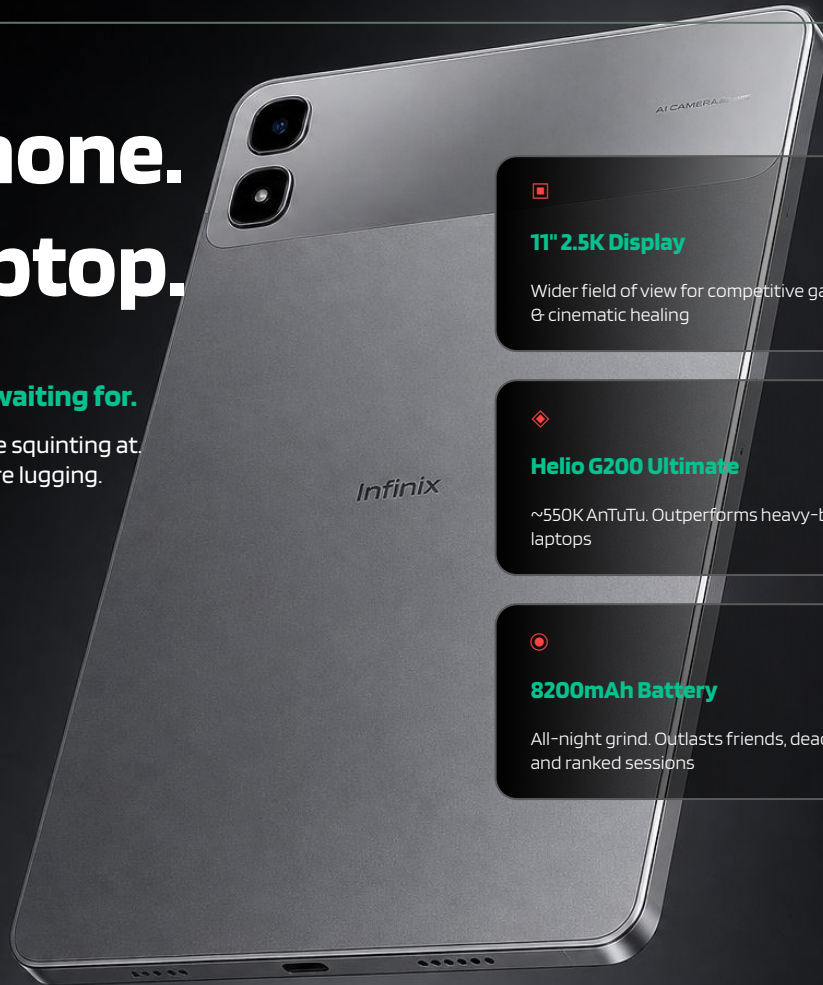

They're not multi-hyphenate by lifestyle.
They're multi-hyphenates by survival.

One body switching between every life
they live. **And they can't afford to drop a
single one.**

Not a phone. Not a laptop.

The edge they've been waiting for.

Bigger than the phone they're squinting at.
Lighter than the laptop they're lugging.

11" 2.5K Display

Wider field of view for competitive gaming
& cinematic healing

Helio G200 Ultimate

~550K AnTuTu. Outperforms heavy-budget
laptops

8200mAh Battery

All-night grind. Outlasts friends, deadlines,
and ranked sessions

4G Connectivity

Freedom from laggy cafe WiFi. Always
connected, everywhere

Free Google Gemini + 2TB Cloud

AI is for everyone

Infinix XPAD gives them the unfair advantage,

the power to own both the lobby and the deadline on one screen, without compromise, without apology.

Bigger than the screen they expected.

Faster than the chip they expected.

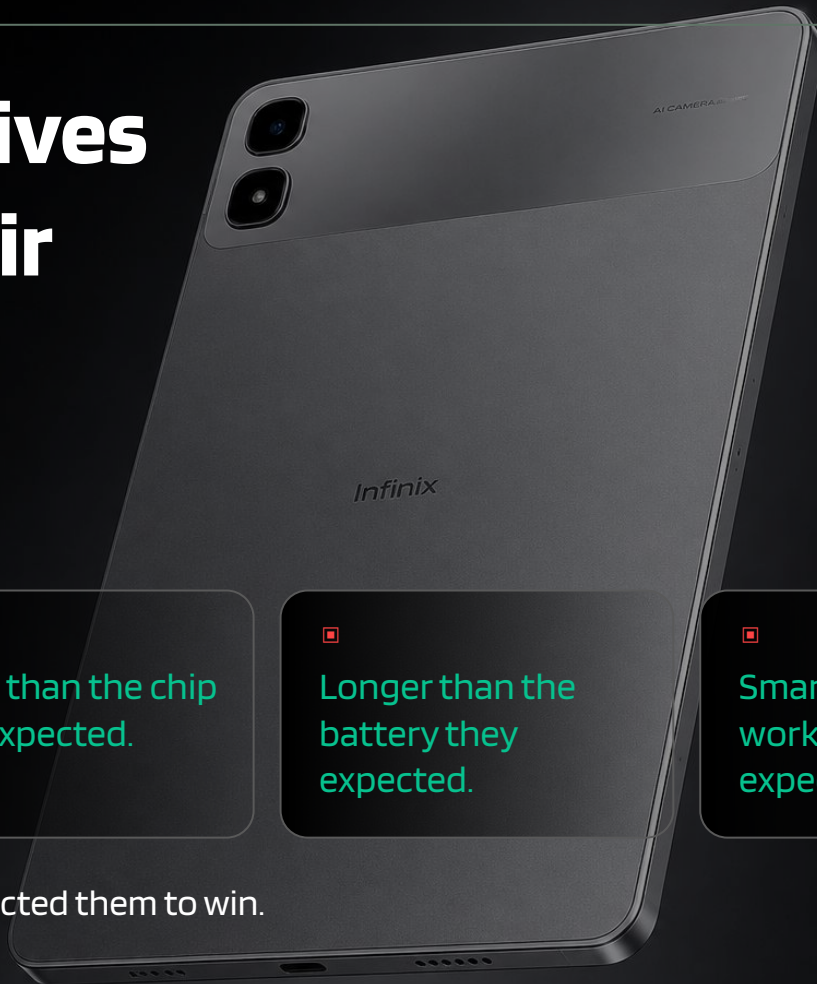

Longer than the battery they expected.

Smarter than the workflow they expected.

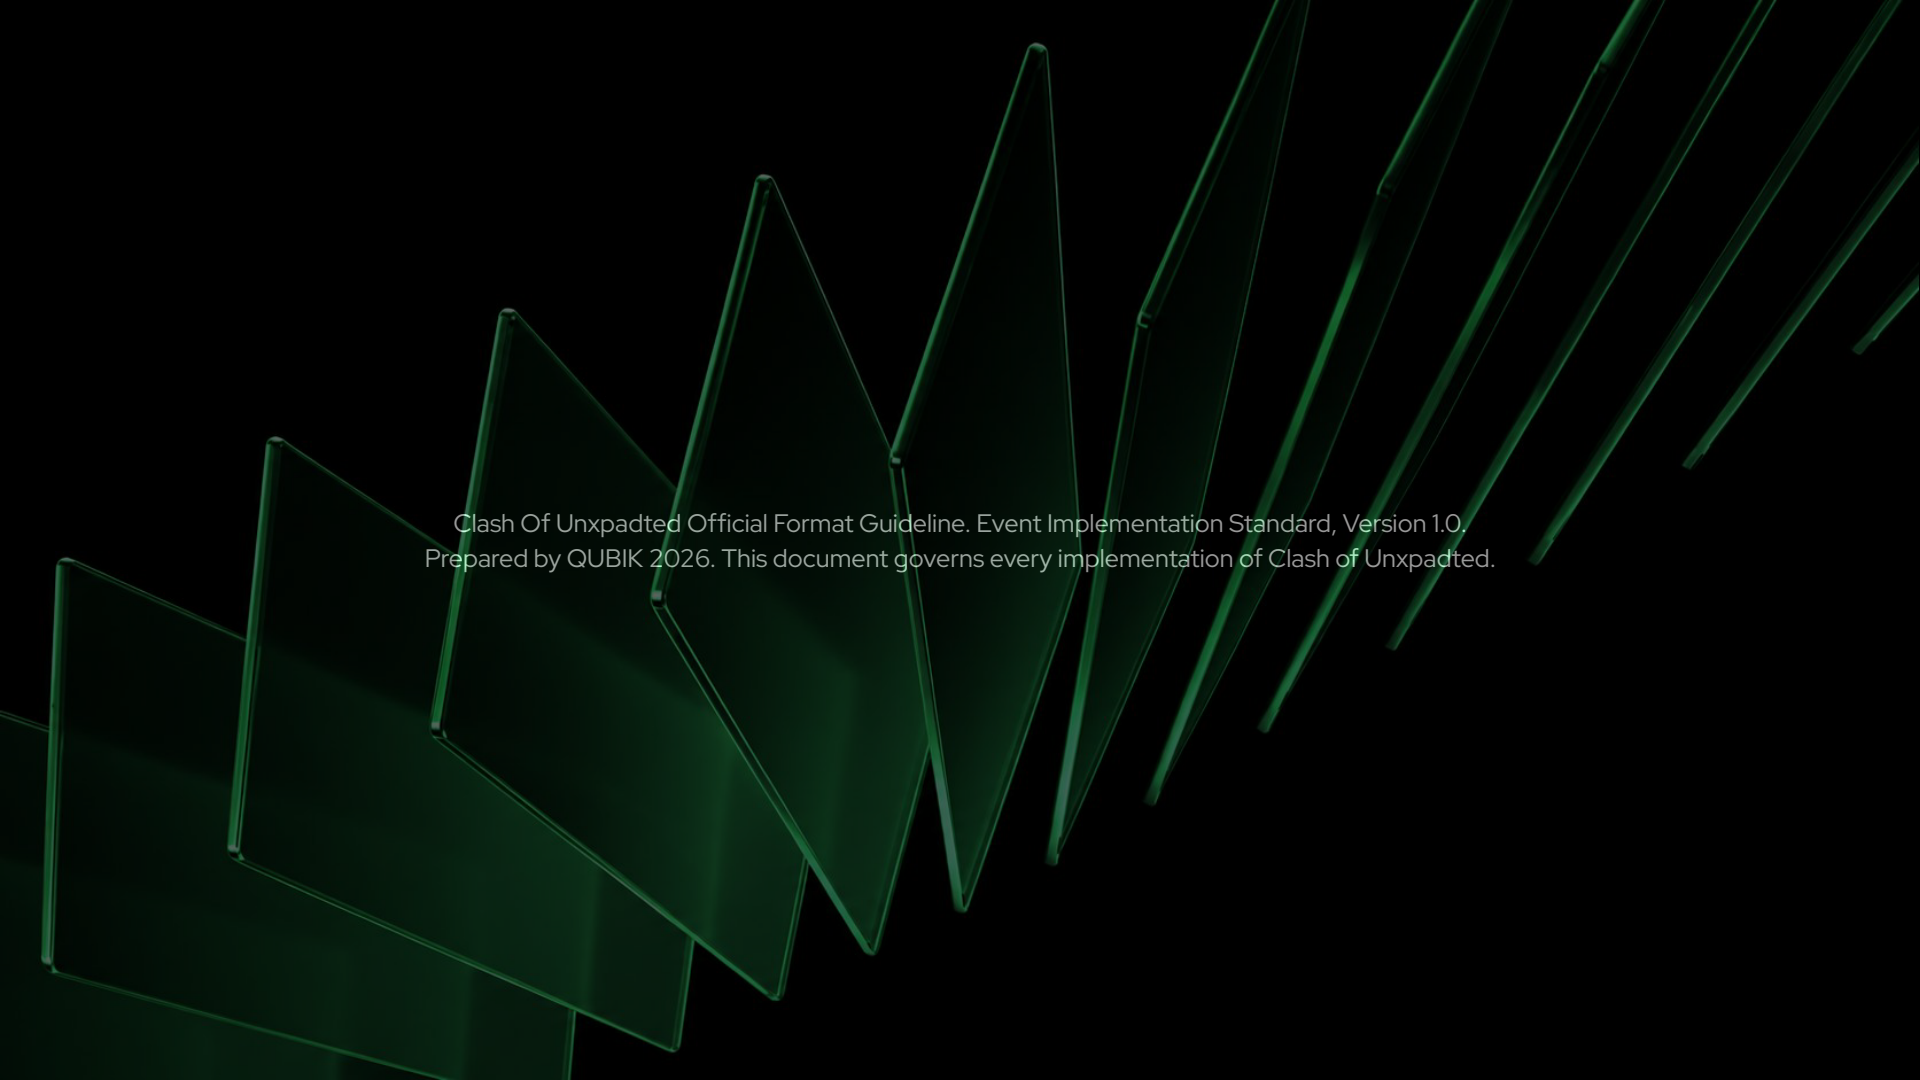

So they show up where no one expected them to win.

Clash Of Unxpadded Official Format Guideline. Event Implementation Standard, Version 1.0.
Prepared by QUBIK 2026. This document governs every implementation of Clash of Unxpadded.

XPAD Arena

The iconic venue of Clash of Unxpacked in Collaboration with Ruang Guru.

Clash of Unxpadded will also be integrated with Ruangguru, continuing from our previous collaboration through the school-to-school Clash of Champions program.

Building on Ruangguru's existing academic competition format across schools, Infinix will introduce a dedicated Clash of Unxpadded section within the program, combining competitive MLBB, Free Fire, and AI-powered study challenges into one experience.

Students will alternate between gaming and academic formats across multiple stations, using the same XPAD, the same clock, and the same competitive pressure.

This collaboration allows Clash of Unxpadded to ride on Ruangguru's strong school network while adding Infinix's gaming and AI learning angle, creating a more relevant competition platform for students who are both academically sharp and competitively skilled.

The format will be merged into selected Ruangguru school events, enabling scalable execution, stronger school penetration, and a direct connection with the Slash Gen audience.

What Is Clash Of Unxpadded

The world's first hybrid esports and academic championship, played entirely on the Infinix XPAD.

Classes battle class versus class through gaming and academic stations on one device, until one class is crowned Class of Unxpadded. Every clash is a duel, two teams, one circuit, one running clock, and first to matchpoint.

THE STATION SYSTEM

The world's first hybrid championship, translated into a floor plan. The academic battle lives at the 4 corners, the esports battle lives at the center, and every match walks the X between them.

Sequence: Every leg passes through the center

X1, X0, -> X2, X0, -> X3, X0, -> X4, X0 Finale.
